

Wang Ming

About Development

I'm passionate about building & designing delightful experiences with the combination of business, marketing and UX/UI design to make customers and users satisfied when they're using products and services online.

I've spent the past 7+ years working across different areas of digital design; Front-end development, Email design, Marketing site pages, app UI/UX.

I also have experience in Blockchain, Ethereum(Solidity), Solana(Rust), NFT, and TradingView Chart with modern, trendy technology such as React, Vue, and App(Android and iOS).

I also have rich experience about Unity3D and 3Dmax modeling.

Strategy

"Ask first. Before jumping into designing I always make sure that I'am asking the right questions and trying to accomplish the right challenges. This stage includes market research, competitive analyses, consulting and exploring possible solutions."

Design

"Problem solving. At the end of this phase you'll have a pixel perfect design for your app or website. During the transition from wireframes into the final design I create prototypes simulating final end results before development."

Development

"Bringing designs to life. Since I'm a full stack developer, I can easily work in close collaboration with developers up until the finish line and beyond. In case of web projects I also do blockchain development."

Quality assurance

"Transparent process. Complete overview of my design process through regular meetings. After the initial design versions I'm happy to do user testing with your customers to ensure the best possible solutions for their needs."

Blockchain & MER,VN Stack & NFT & App Senior Developer

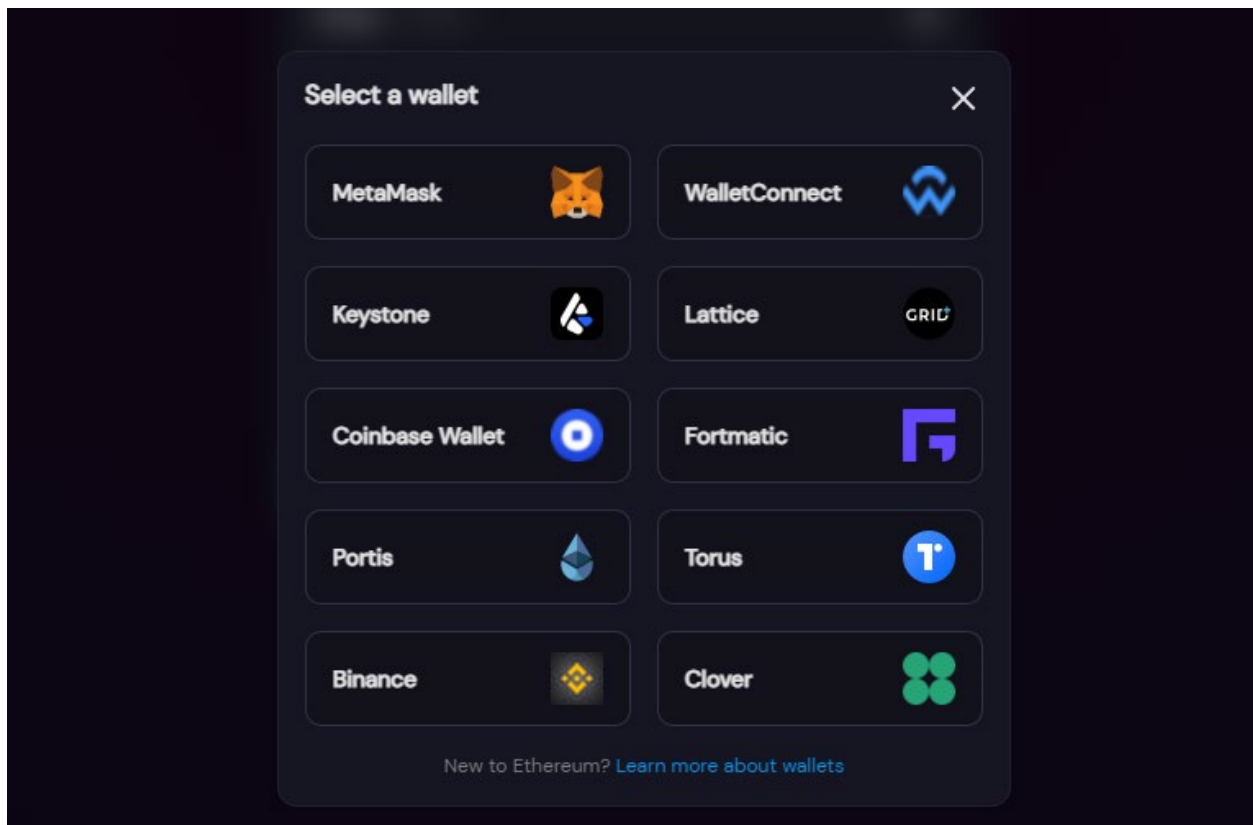

=====Blockchain=====

*Chain : Bitcoin, Ethereum, Solana, BSC, Polygon, Avalanche, Tron, Eldron

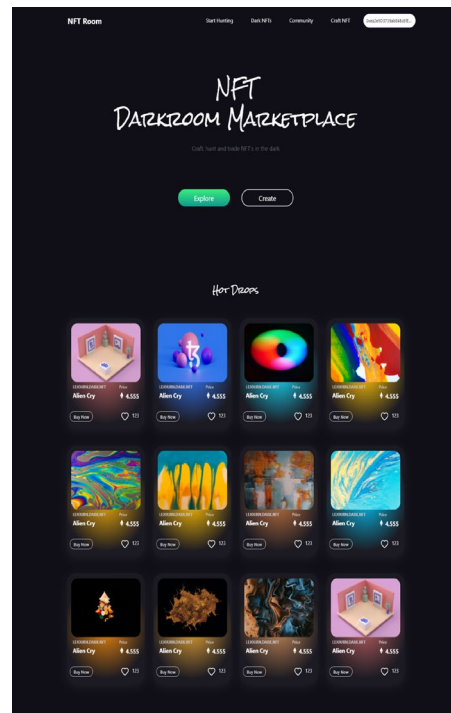

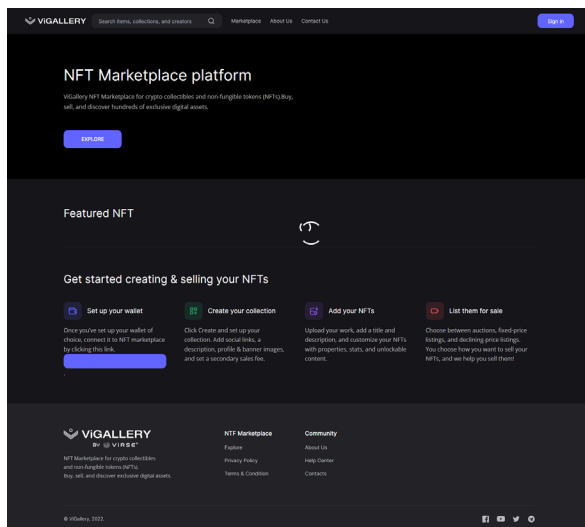

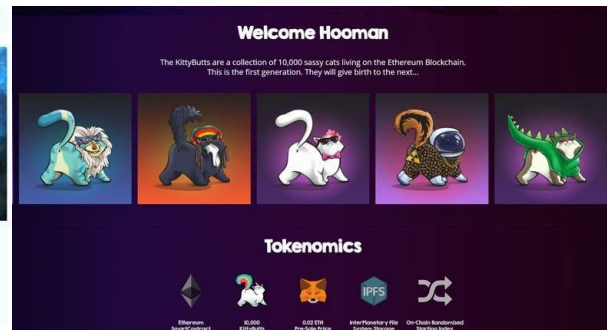

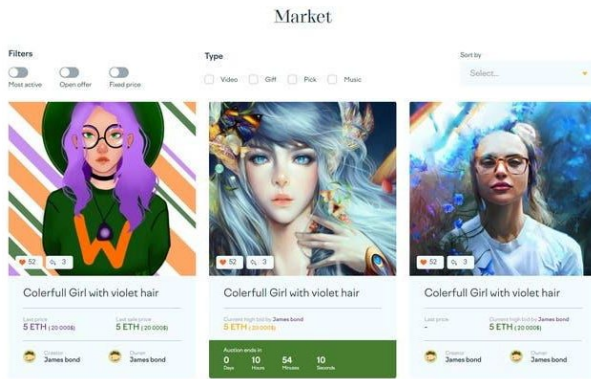

*Cryptocurrency : ERC-20, ERC-721, ERC-1155, BEP-2, BEP-20, BEP-721, TRC-20

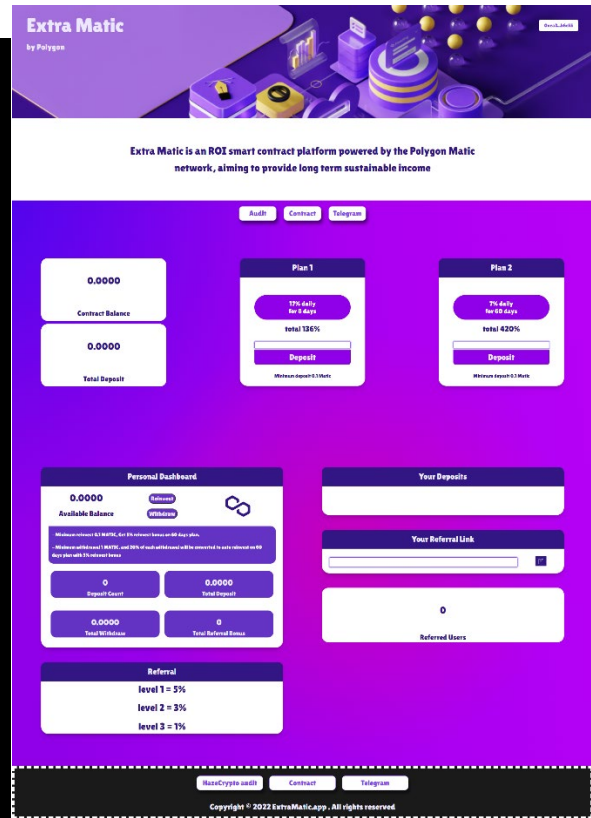

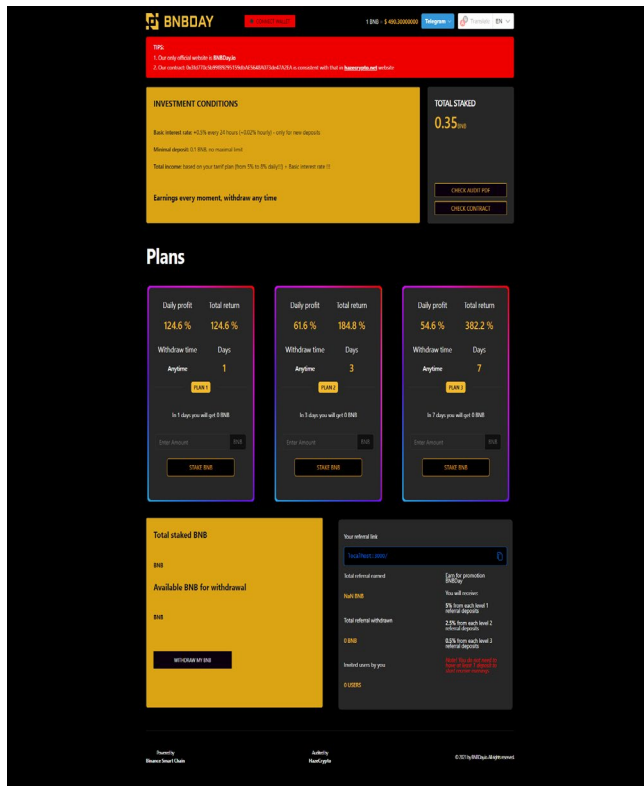

*Wallet Connect : MetaMask, TrustWallet, Coinbase and more using Web3.js

*NFT : NFT Minting, Staking, Marketplace

*Token : Swap, bridge, staking etc

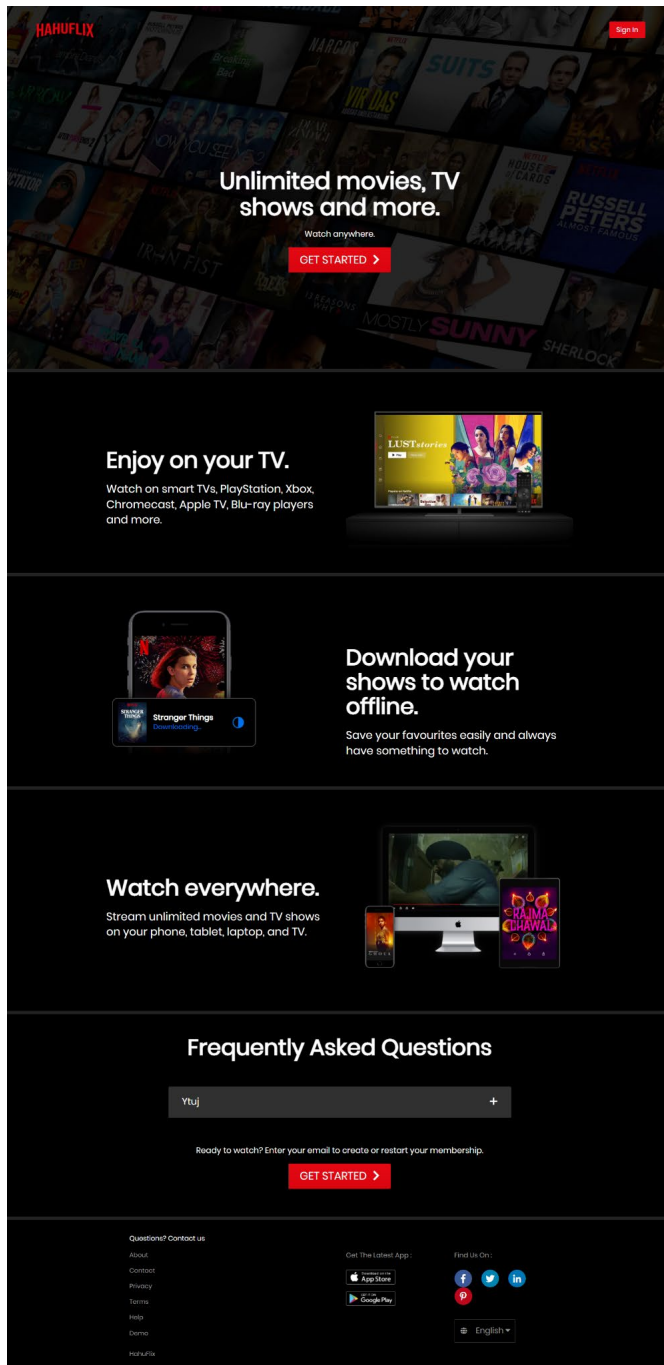

*Trading View

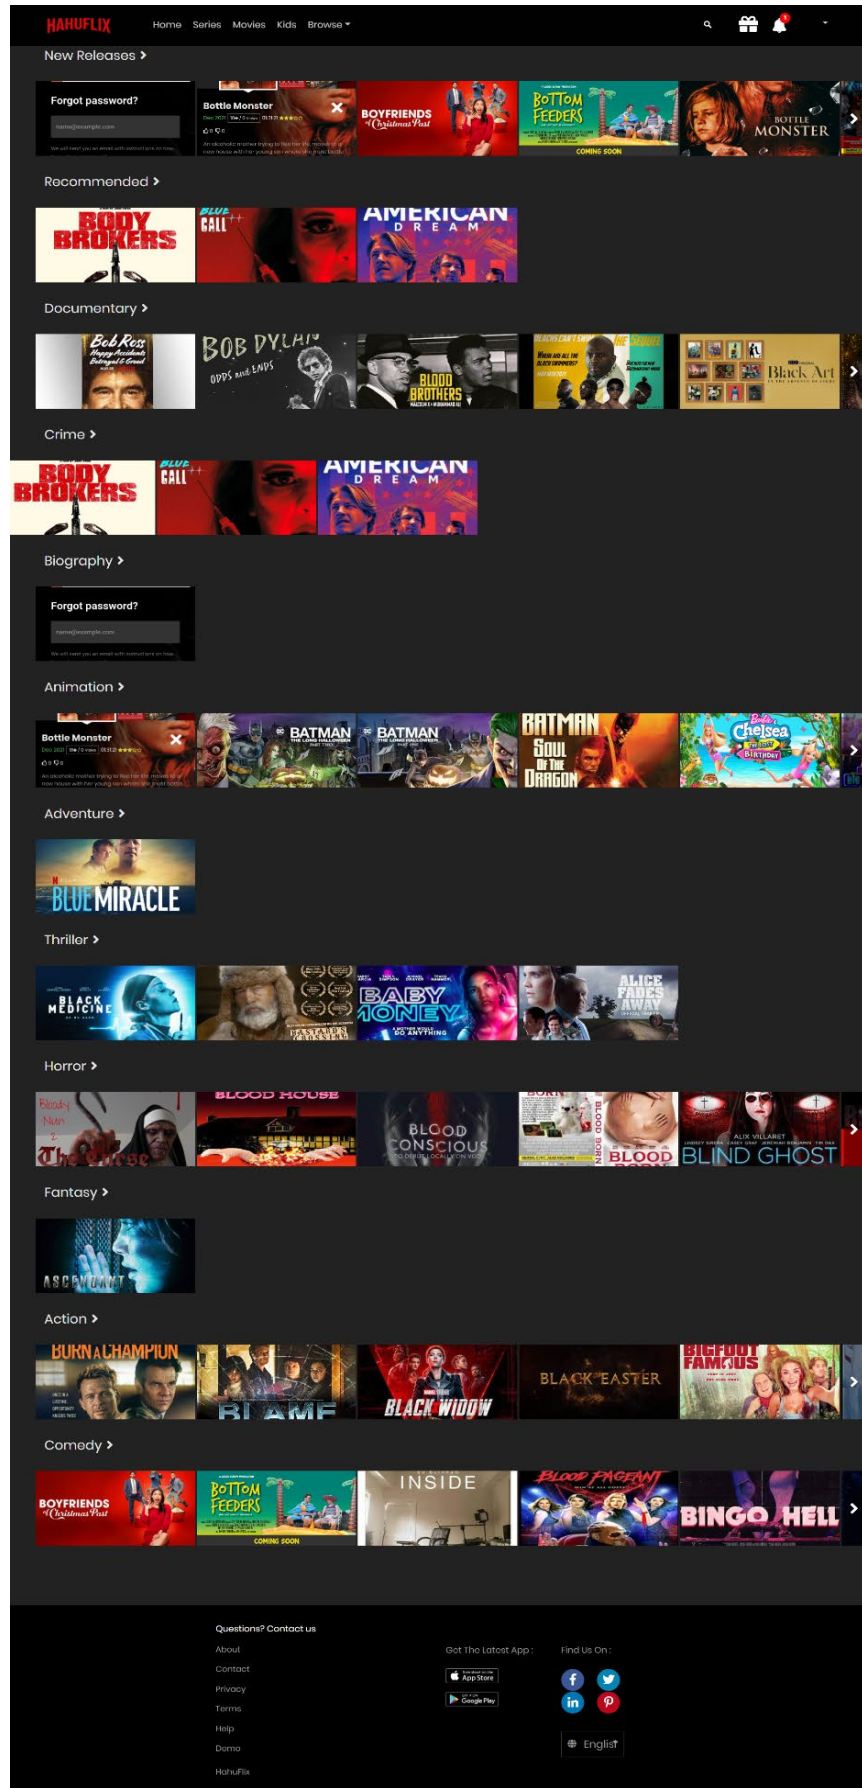

Display 10 

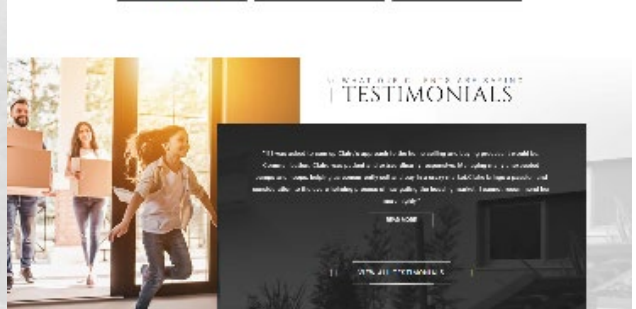

=====Web Dev & Design=====

*PHP framework : Codeigniter, Laravel, Wordpress

Movie LiveStream

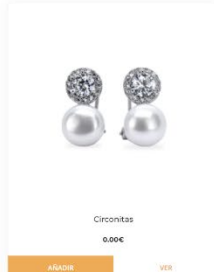

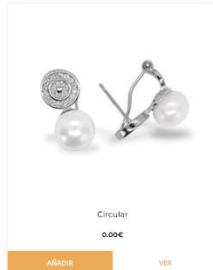

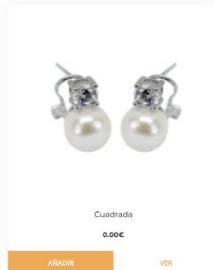

Real EstateWebsite
