Vladislav Arakelov

Senior *fullstack* developer with 6+ years of experience

★ Career Objective:

Self-motivated Web Full-Stack Developer with 6+ years of experience working on multiple projects. Especially 5+ years of practical front-end development experience.

Very familiar with Vue.js, React, Next.js, Laravel, Node.js, SpringBoot as well as HTML5, JavaScript, CSS, SASS, SCSS, Pixel perfect, Material UI, UI/UX, Firebase, AWS.

Passionate and hardworking with penchant for meeting deadlines. Interested in role with company promoting best practices and offering diverse customer projects.

Very passionate to learn a new languages and techs. I have been studying and learning about the Blockchain and some experience with Crypto.

I have 2+ years experiences of writing , testing , deploying and verifying solidity applicaiton. Using solidity, web3.js and smart contract, I have added collections and 10k NFTs including ERC721 and ERC1155 assets on Ethereum mainnet.

In Solana network, I have developed NFT minting site with 10k nfts using metaplex, random source engine and react.js

Also I have developed many NFTs market places on another blockchain network and you can check it open.sea.

Thanks.
